Tuesdays from 12pm - 2pm EST

Fully online: Weekly interactive synchronous sessions by Zoom

Course Instructor: Martha Caswell

Graduate Credit & Professional/Non-credit options available

Register now!

This course seeks to provide students with both conceptual and practical content, covering the evolution of the field of agroecology, from its origins to the present, as it gains increasing recognition in scientific, policy, social movement and farming spaces. We will explore some of the debates around application, the risks of cooption, and agroecology’s potential for moving us closer to full transformation of our current food systems.
